Robust Understanding of a Student's Abilities

Unlock Your Student's Potential

OLSAT 8 measures cognitive abilities that relate to a student's academic success in school. By assessing a student's verbal, nonverbal, and quantitative ability, OLSAT 8 supplies educators with valuable information to enhance the insights gained from traditional achievement tests.

- Content clusters and item types include verbal, nonverbal, and quantitative.
- Obtain student's Achievement/Ability Comparison (AAC) score when administered with the Stanford Achievement Test Series, Tenth Edition (Stanford 10).
- Specialized statistical procedures and comprehensive review of all test items by minority-group educators help minimize ethnic, gender, cultural, and regional bias.
- Evaluates a student's performance on a variety of tasks, including detecting likenesses and differences, recalling words and numbers, defining words, following directions, classifying, establishing sequence, solving arithmetic problems, and completing analogies.
- OLSAT 8 Online provides web-based test delivery with immediate scoring and reporting
- Pearson's dynamic reporting tool, Results Online will help turn data into information you can use and give you a greater insight to your OLSAT 8 test results

Put Achievement into Perspective

If you've ever wondered whether students' achievement matches their potential, you can now find out with the Achievement/Ability Comparison (AAC) score. Scores obtained from combined achievement/ability testing give educators a more complete picture of each student's potential for success in school.

The AAC score describes a student's achievement in relation to the achievement of students with the same measured school ability. This is an important distinction, since students whose achievement appears to be below average when compared with a national sample of all students may, in fact, be achieving at a higher or lower level in comparison with students of the same measured ability.

Obtain an AAC score when you administer OLSAT® 8 (Otis-Lennon School Ability Test®) with the Stanford 10 (Stanford Achievement Test Series, Tenth Edition). OLSAT 8 is a general academic ability indicator that is not content specific. The OLSAT 8 score projects how well the student is able to learn. Stanford 10 indicates what he or she has learned. Combined, the AAC describes a student's achievement in relation to the achievement of students with the same measured school ability.

The Student Report shows the AAC score, obtained when OLSAT8 is administered with Stanford 10.

with Otis-Lennon School Ability Test®, Eighth Edition

About This Student's Performance:

Jfirst recently took the *Stanford Achievement Test*, Tenth Edition (Stanford 10). This test is one measure of this student's achievement. This report compares this student's performance to students in the same grade across the nation. Percentile Bands show ranges within which this student's true scores likely fall. For example, a student whose Percentile Band spans the 70th percentile performed as well as or better than 70% of students nationally in that subject.

The chart below shows this student's performance in each subject area tested.

Lexile measure = 780L

Information on the use of Lexiles can be found at www.PearsonLexile.com. Lexiles used with permission.

Otis-Lennon School Ability Test®	Number Possible	Number Correct	SAI	Age PR-S	Scaled	Natl Grade	National Grade Percentile Bands		
Total	72	35	101	52-5			70	90	99
Verbal	36	18	102	55-5					
Nonverbal	36	17	100	50-5					

AACs describes a student's achievement in relation to the achievement of students with the same measured school ability.

Clusters	NP	NA	NC	Below Avg	Avg	Above Avg
Word Study Skills	30	30	29			
Mathematics Procedures	32	32	30			
Mathematics Problem Solving	48	48	27			
Mathematics Sense & Operations	24	24	14			
Mathematics Relationships/Algebra	6	6	5			
Mathematics Data, Statistics & Probability	8	8	4			
Mathematics Geometry & Measurement	10	10	4			
Mathematics Communication & Representation	6	6	4			
Mathematics Estimation	8	8	2			
Mathematics Mathematical Connections	21	21	13			
Mathematics Reasoning & Problem Solving	13	13	8			
Mathematics Thinking Skills	40	40	23			

In addition to a Total score, OLSAT 8 also provides separate Verbal and Nonverbal part scores. A student's ability to learn school tasks is dependent on both types of skill, although the Total score is the best overall indicator of school-learning ability.

OLSAT 8 Online

OLSAT[®] 8
Otis-Lennon School Ability Test[™]
Online

This all inclusive solution will deliver immediate test results to facilitate reporting and placement decisions. Plus, there's no distributing of test documents, and no time consuming document collection and shipping, saving time and costs. You can also combine online testing with paper-pencil testing if you so choose by using our new Flexible Testing Method.

- Available for Grades 3–12 (Levels D–G).
- OLSAT 8 Online is quick, easy, and fast—with immediate reporting.
- One simple price—test delivery, scoring, and reporting that's all inclusive.
- Use our new Flexible Testing Method solution which allows blended online and paper-pencil administration with combined reporting.
- Administer with Stanford 10 Online to obtain faster results, plus the many benefits of AAC scores.

Gain Greater Insight by Turning Data into Information

Test results answer your questions about student performance, but only if the data is presented in a way that's easily interpreted. Our dynamic and intuitive web-based reporting solution gives you the power to go beyond OLSAT 8 results to gain data-rich insight about how your students, schools, and districts/dioceses are performing.

If you send your OLSAT 8 test to Pearson's Central Scoring Service, more immediate results can help educators quickly choose the precise data to create reports that are meaningful and informative. Aggregate and disaggregate data, create comparative analyses, and customize your reports by students, class, school, district, or diocese level so all stakeholders have a clear understanding of the outcomes. Results Online provides insight about student performance for monitoring growth and achievement, and targeting instruction for students who need differentiated instruction.

Assess Verbal, Nonverbal, and Quantitative Skills

OLSAT® 8 provides a technically excellent measure of cognitive ability that has gained the confidence of educators nationwide. The test's seven levels collectively assess the range of ability of students in grades K–12. Each level assesses a student's verbal, nonverbal, and quantitative skills to provide a comprehensive view of a student's abstract thinking and reasoning skills.
